Subject: Rally Rescheduled?  
To: [Sandy@levees.org](mailto:Sandy@levees.org)

Good Morning-

Has your rally been rescheduled?

I have to admit, I did not see the point behind it anyway, but nonetheless, the First Amendment grants you that right.

I think you should know that many folks in NOLA disagree with your views and have begun to organize in an effort to stop the dissemination of inaccurate information that organizations like yours put out. In our opinion, inciting anger in the residents of this great city does nothing but divide its people and hurt real progress for rebuilding the system.

Did you ever stop and think that over 1400 people in this great city work for the Corps of Engineers??? You have not only offended them by solely placing blame on their organization, but their families, friends and coworkers from around the globe as well.

I applaud you for your efforts to find the truth, and report it, but you have made some assumptions that are completely false and totally inaccurate. Maybe the Corps of Engineers can help you better understand, after all, they are not the enemy, many of them are just like you....NOLA residents who have lost everything and try to move forward and rebuild in hopes of a better life.

Regards,  
Lauren Solis
